

## ACCUCOUNT EGG COUNTERS ACCUCOUNT N SERIES

The N series Accucount is the most accurate egg counter on the market today. It was designed to be installed over with egg belts or conveyors up to 50 cm wide.

Using our patent counter all eggs passing under the N series will be counted.

The N series can be ordered in sizes: N20 - 20 cm, N30 - 30 cm and N50 - 50 cm. N75 - 75 cm N100 - 100cm

The Accucount N series is a stand alone egg counter giving a pulse out for each egg that has been counted. It can be connected to a controller for displaying and logging the amount of eggs counted by each connected counter.

Accucount N50/30/20 has 5 lights located on the top side of the counter and one cable with a plug on the top left hand side of the counter.

**System lights:**

The 4 system lights will blink continuously once the counter has been connected.

**OUT light:**

The OUT light will blink once for each egg that passes under the counter.

### TECHNICAL DETAILS:

Power supply of 12 VAC.

Output count pulse 50 m.sec for each counted egg.
